

Final Interaction/Long Term Growth Report

The student is to write a 3-5 page summary describing what God has done in their lives through the course.

Describe what you have done and how you have changed through the term. What have you learned, how has that changed your attitude and the way you think about yourself and your situations, and how has that changed your actions? How have you experienced God's work and presence?

Describe your long-term strategies for continued victory/holiness/growth throughout your life, based on the insights you have gained from this course. In what areas is God challenging you for further growth and how is He leading you to attain it?

The format of this summary is flexible, but a past-present-future organization would be helpful. This report must be typewritten, essay format with standard MLA format. Resources are not required, but any resources used must be properly documented.

This report will NOT be marked based on how dramatically God has been working in your life. But it will be marked on how you are genuinely pursuing Christ and striving after personal growth and holiness, demonstrated by how you are working to implement and apply the insights from this course and how you are thoughtfully purposing to continue this lifestyle after the completion of the course.
